

Intensive course:

Professional typing

Achieve touch-typing in only a few hours

Within a few hours, the participants will master touch-typing without having to look at the keyboard. All letters, punctuation marks, and upper and lower case are taught as well as the numbers in the row above the letters. Supplementing this course, participants will receive access to the writing trainer at fingerLINK® online for 180 days to assist them in their practice to achieve a better speed and accuracy.

One forward, two back?

After this intensive training, you may be a little slower at the beginning, but your speed and accuracy will increase enormously after a short time. Compared to that, the old two finger typing method will be perceived as slow.

Method of learning

The participants learn to link each key with a simple image, this is based on the Ancient Greek mnemonic technique. These images are then joined together to 10 simple and memorable stories. After a very short time, each finger masters its own short story, and by doing so, also the correct key assignment which from now on remains deeply anchored in your long-term memory. These visualisation stories later sink into oblivion as soon as touch-typing has become deeply engrained into your mind.

Who should take part?

Those who are open to the latest learning methods and are looking for fast and secure success.
